

NATURE

Nature is a gift of God
Which we all like a lot
Seas are there and
Trees are there
Deers are there and
Bears are there
Everything is there but
If we create pollution then
Nothing will be here

If we cut trees it will cause pollution
To which there is no solution
Celebrating festivals is our job
But polluting the environment is not our job
Burning of crackers is our passion
But burning of our forests should not be the fashion

When love is here
Then nature is here
When pollution is here
Then God's creation won't be there
Help the nature
And be a good creature.
