

WHAT MY TEACHER SAYS TO ME

My teachers' name is Rajni Negi ma'am. She is one teacher who is full of love and kindness. She tells me how to laugh, how to work on my own and how to read. When Rajni ma'am came I felt my mother had come to tell me special things like she always does. When she entered our class I asked her "what do you like the most?" She smiled and replied "I like when someone laughs." She told me three important things which are: First we should work hard and we will touch the sky. Second to believe in God, He will give us what we want. This does not mean we just pray to God all day and do not do anything. And third is to take knowledge and give knowledge. We should spread and share knowledge if we don't do that, all the knowledge will remain only with one person.

I want to request all the readers to spread this message....do you remember the third point to spread knowledge.....
